ABSTRACTED-PUB-NO: RU 2118487C

BASIC-ABSTRACT:

NOVELTY - Micro greenhouse has bell-shaped constructional members made from transparent material and provided with opening in top part and annular embosses on wall. When bell-shaped members are mounted one above another, annular embosses define air pads between bell-shaped member walls. Top opening prevents outer cold air from entering into bell-shaped member cavity due to filtration of warmer air from ground and air pad prevents air within mentioned cavity from supercooling at frosts of up to -5 C.

USE - Plant growing.

ADVANTAGE - Increased efficiency and simplified construction. 1 dwgi
